T&D &europe

The European Association of the Electricity Transmission
and Distribution Equipment and Services Industry

Scope & Activities

T&D Europe is a driver for advanced solutions and technologies in the field of electricity networks, encouraging an energy- and cost-efficient as well as an environmentally friendly infrastructure.

Who we are

T&D Europe aims

to promote and to defend the common technical, industrial, economic, environmental and political interests of the European electricity transmission and distribution manufacturing, and product derived solutions industry.

T&D EUROPE was created

in March 2008 by the merger of two European committees, CAPIEL HV and COTREL. It represents all relevant European national associations. The companies represented by T&D Europe account for a production worth over €25 billion, and employ over 200,000 people in Europe.

The scope of T&D Europe

industry includes the complete range of products and services necessary to transport and distribute electricity in high and medium voltage, between the producers and the end users.

T&D Europe covers

all installed equipment, products and systems as well as services required for operations on electrical transmission and distribution networks or electrical installation in infrastructures, industry and buildings.

T&D Europe works

in collaboration with European and international standardisation bodies, in order to establish a coherent system of worldwide standards and testing.

Activities of T&D Europe include:

- promotion of the T&D industry, its expertise in leading technologies and its contribution to the European economy;
- monitoring of regulatory, economic and technical developments at European level of interest to T&D Europe;
- dissemination of information among members, maintaining a close link with the European institutions and other stakeholders.

Organisation
